

Staff Survey

A written questionnaire to assess unit awareness, attitudes, and perceptions of Patient Safety Rounds

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
1. I have taken part in Patient Safety Rounds.					
2. I am aware that one of the RNs on my unit has been identified as a Clinical Champion for Patient Safety Rounds.					
3. Patient Safety Rounds are an easy way to report incidents, near misses, etc.					
4. Patient Safety Rounds are an effective way to report incidents, near misses, etc.					
5. I feel safe reporting incidents, near misses, etc. through Patient Safety Rounds.					
6. Patient Safety Rounds has a positive impact on patient care.					
7. Patient Safety Rounds have resulted in better care on my unit.					
8. When an error is brought to the attention of my supervisor, it is dealt with in a problem-solving manner, rather than a blaming manner.					
9. I think patient care at this organization is safer than at other healthcare institutions.					
10. What is one thing you would change about Patient Safety Rounds? Please explain.					
**11. Has adding a patient to your unit- who asks other patients questions about patient safety- influenced or affected your practice in any way? Yes _____ No _____ Please explain.					
* Only to be asked if a Clinician Champion has been identified on the unit.					
** Only to be asked on units where Patient/Family Safety Liaisons have been introduced.
